

## RSW Industries' "SHOOTING SHELF KIT" (#SSK)

[www.rswindustries.com](http://www.rswindustries.com)

**Thank you for purchasing our all-steel, made in America target products.** This kit uses the Torso Target Brackets which attach to the top threaded portion of the existing hooks used to hang the targets. You can then insert the legs of the shelf into the torso target brackets and secure the shelf using the thumb screws in the brackets. You can also use 1" x 2" x 6 foot or 8 foot furring strips to hold and support paper torso targets. **Please see [Torso Target Brackets instructions](#).** Remove the top nuts and flat washers from each of the threaded hooks used to hang the targets. Unscrew the bottom nuts on each to allow an additional ¼" of thread to stick up through the bracket plate welded to the stand. With the angle of the plate welded to the tube of the Torso Target Bracket angling upward, place the bracket onto the threaded portion of the hooks. The threaded portion of the hooks will now be sticking through the Torso Target Bracket plate. Replace the flat washers and nuts and securely tighten. While tightening make sure the "hook" is facing forward as provided from the factory. Insert each leg of the shelf down into each of the tubes **with the hole in each leg facing the thumb screws** and align the thumb screws with the holes. Tighten thumb screws so they advance through the hole and press against the inside front wall of the tube legs and tighten to secure the shelf.

You can now set pop cans, tin cans, plastic pop bottles, bowling pins, etc. on the shelf and plink away. The shelf also has a few hole just the right size to push long style golf tees into and then set a golf ball on the tee or shot at the tee to see how good you are. This shelf kit is a great option for youngsters to shoot at cans with their BB gun or pellet rifle.

**CONSUMER PRODUCT WARNING:** *RSW assumes no responsibility for the use or misuse of this product. "You" are responsible for the safe use of these target products. Assure you are shooting at a safe distance, in an access restricted area which will protect you, others, animals and property from ricocheting rounds. This caution cannot cover all possible conditions and situations that may occur. It is understood by the user that common sense and appropriate cautions are factors that cannot be built into these products and can only be exercised by the user.*
